Feedback TP1

TP2

- Data base - theory
- Data base practical
- Note : Hand-in SQL
 - No need to depict every query element
 - If I run all your queries in a row, I should have the final results -> INCLUDE ALL
 - **We use SELECT in the data base table**
 - **SELECT * FROM table ;**

QGIS - Spatial light

- `SELECT load_extension('mod_spatialite');`
- `SELECT InitSpatialMetaData();`
- `SELECT AddGeometryColumn('TABLE', 'COL_NAME', 4326, 'POINT', 2);`
- `UPDATE TABLE`
`SET COL_NAME = MakePoint(Longitude, Latitude, 4326);`
