

Lighting Performance Checklist: Basketball

Prior to being approved for a televised event, facility must submit this checklist during the championship process to the championship administrator. Phone: 317/917-6222.

Inspection must be completed by a qualified lighting technician using a light meter calibrated within the last 12 months.

Press "TAB" to navigate to cells to enter required data. Average light levels and uniformity values automatically calculate when data is entered from light readings at each point on the court.

Notes:

Grid court as shown on the drawing below. Readings are taken in the middle of each square with light meter held 36 inches above ground, pointing up.

Number of grid points will vary depending on court size and layout.

To obtain average light level value:

1. Record light level readings within each square
2. Total all readings, divide by number of grid readings taken

To obtain uniformity ratio:

1. Divide highest (maximum) light level reading by the lowest (minimum) light level reading

10' x 10' grid

Instructions – Horizontal Light Level Readings:

Complete for all surveys.

If outdoors, click outside the court perimeter to select approximate pole locations on the layout below.
